5.March.2021 update:

we have debunked the debunkers the article of Jean-François Cliche lesoleil.com and the one of Bill Gates 'MSN network

please see our debunking in french below, and in english here.

with our conclusion: LeSoleil/Jean-François Cliche+Msn/Dan Satherley=Bill Gates=FAKE NEWS for pushing people to take the shot.

הចטרף: 23 יוני 2006  
ההודעות: 911

- this article has been published first in hebrew here
- we gave an interview in French to francesoir.fr who translated it in french here
- it has been as well reported in russian here in english in Arutz 7 here [and in the U.S here](#)
- and reported in several other language including greek here

this article can not be debunked since it is based on real data that have been exposed but since its publication the Israeli ministry of health and the Pfizer/Moderna coalition keep trying to deceive the public with biased "scientific" article ([like the new england journal of medicine](#))that intentionally focus on the Covid sickness two weeks after the 2nd shot and hide the most important data that is the death numbers among the vaccinated people from covid and other adverse effects after the first shot.The fact that Dr Ran Balicer the corresponding author of the NEJM publication, works for the Israeli health department as head of the Kfar Shalem research institute and received grants from Pfizer may explain it...as well as 7 other co-authors of the publication.. see [here](#)

we have debunked the NEJM study please read our article, their data validate our analysis here:

Exposing distortions in the NEJM scientific publication on the efficiency of Pfizer's vax

### Section 6. Disclosure Statement

Based on the above disclosures, this form will automatically generate a disclosure statement, which will appear in the box below.

Dr. Balicer reports grants from Pfizer, outside the submitted work;

The uncovering of the vaccination data in Israel reveals a frightening picture

Analyses below of an article promoting COVID-19 vaccination enable to uncover all vaccination data and a frightening situation

Second draft

On February 11 2021 Ynet (the most known Israeli News website) published a confused and confusing article entitled "Vaccination efficiency data in Israel, and its rapid effects on the young".

Our reanalyses of these data explain why during the massive vaccination project initiated mid-December 2020 during a confinement, daily new confirmed COVID-19 cases failed to decrease as they do during confinements, and, more importantly, why numbers of serious, critical and death cases increased during that period that covered at least one month. From mid-December to mid-February (two months), 2337 among all Israeli 5351 official COVID-deaths occurred. Our analyses indicate orders of magnitude increases in deaths rates during the 5-week long vaccination process, as compared to the unvaccinated and those after completing the vaccination process. Presumably, asymptomatic cases before vaccination, and those infected shortly after the 1st dose, tend to develop graver symptoms than those unvaccinated.

The Ynet article is organised in an exciting way and uses data provided in an erroneous way by the Ministry of Health. It is unclear whether this was intentional to prove the vaccine's efficiency or if this was done erroneously because the provided data were misunderstood. Note that in Israel, all vaccines are from Pfizer.

We bring a very important example from the article, in relation to the table provided by the Ministry of Health. As per the text "However, 546 among the dead were such that were not at all vaccinated or got the first vaccination dose within two

"weeks before their death" differs from the table. This is clearly unfounded because all data presented in the table and provided below describe only COVID-19 patients that got at least the first vaccination dose. This is clear from examining the table. The grand total is 43781 COVID patients who got the first or the second vaccine dose. Among the total of 660 deaths, 546 got only the first dose.

The data in the table, rather than indicating the vaccine efficiency, indicate the vaccine's adverse effects.

	Community	Low	Mean	Serious	Critical	Died	Total
> 60 years	13075	323	314	865	183	636	15396
1 <sup>st</sup> dose	10724	259	277	742	152	546	12700
0-13d	6235	147	166	465	81	344	7438
>13d	4489	112	111	277	71	202	5262
2 <sup>nd</sup> dose	2351	64	37	123	31	90	2696
0-6d	1043	24	11	57	13	51	1199
7-14d	1037	32	25	56	17	35	1202
>14d	271	8	1	10	1	4	295
< 60 years	28018	138	92	166	37	24	28475
1 <sup>st</sup> dose	25926	125	87	153	34	22	26347
0-13d	19461	96	66	124	29	17	19793
>13d	6463	29	21	29	5	5	6552
Other	2						2
2 <sup>nd</sup> dose	2092	13	5	13	3	2	2128
0-6d	1167	8		4	1	2	1182
7-14d	761	4	4	8	2		779
>14d	164	1	1	1			167
All ages	41093	461	406	1031	220	660	43871

For that purpose we need first to understand that the provided table describes the state of COVID-19 patients that got the first or the second vaccine dose at given dates, as started in the article "...emerges from the data that among 856 patients above 60 years in serious state hospitalized at this time..." we assume that the article published February 11 reflects the situation in hospitals the previous day, hence February 10 2021, or February 11 2021.

On February 10, the number of serious active cases was 1056 according to the control panel of the Ministry of Health, see photo below.

This surprisingly shows that most serious hospitalized cases on February 10 or at a near date were in fact vaccinated with the first dose or up to two weeks after the second dose. See the table of the vaccinated patients showing 1031 serious and 220 critical cases at the time the table was done. This matches the article in hebrew from February 1st 2021 "Can one show that the vaccine from Pfizer is today's major cause for high death rates in Israel and the world?".

However, this is not the last surprise we get from examining the data from the Ministry of Health.

We can subtract the number of people with the first vaccine dose on January 19 2021 from that on February 10 2021. During these 21 days, 1331881 Israeli citizens got the first dose. The table shows that 568 among these died, hence 0.042% and that 39047 among them became a COVID-19 case, hence 2.9 %.

For the 2nd dose we focus on data specific to two weeks after the 2nd vaccination according to the table.

From January 26 to February 10 2021 909102 Israeli citizens got the 2nd vaccine dose. Among these according to the table, 92 died, 0.01%.

Hence, during the 5 weeks since the first dose at least 0.05% of first dose recipients died. This death rate relates mainly to a relatively young population whose vaccination started on January 19, a period during which most vaccinated were below 65.

In order to estimate the death rate of those above 65 which were mostly vaccinated before that period we use data reported by the USA-based VAERS,

There we found, see article in english, that the ratio of deaths by those above 65 vs those below 65 is about 4.42 (155/35). Hence the death rate of those above 65 between the first and the second vaccination dose should be until January 19 0.042 (the death rate of those below 65) multiplied by 4.42, resulting in 0.186%, which is close to the 0.2% reported by the Ministry of Health on January 21 2021.

This value of 0.2 % death has been mysteriously modified later on by the Ministry of Health and was switched to 0.005 without any explanation, see article in hebrew. Above considerations show that the death rate data provided first were correct, the updated death rate data might have been intended to suggest lower death rates among the elderly.

The exposures do not end here.

The number of COVID-19 deaths among the vaccinated since the start of the vaccination action seems to explain the increased death rates from COVID-19 observed since December 2020.

For that purpose, we calculate the products of the number of vaccinated people above age 65 by 0.2 and the number of

vaccinated people below 65 by 0.04. This shows that most COVID-19 deaths in that period are for vaccinated people, as shows the table provided by the Ministry of health at the beginning of February.

During the vaccination action from mid-December until mid-February, 2337 among all 5351 COVID-19 deaths reported for Israel occurred, 43.7%. Among these, since January 19, 1271 COVID-19 deaths were reported for Israel. The table provided by the Ministry of Health on February 10 states 660 COVID-19 deaths among the vaccinated, 51.9% of the deaths for that period. Only 1.3 million Israeli, among 8 million (about 1 in 8, 12.5%), were vaccinated during that period. Accordingly, vaccination promotes deaths because 51.9% of deaths during that period are for the 12.5% vaccinated in that period. In addition the serious and critical cases during that period is more than the reported serious cases, the adverse effect of the vaccination process is most likely worse than what appears from the data at hand.

The horror continues. The deaths among those vaccinated should be added to the numerous AVC and cardiac events reported just after vaccination that are not included among COVID-19 deaths which about double the deaths among those vaccinated, whose numbers remain unknown and which we will try to find in the coming days.

At this point we state that vaccinations caused more deaths than the coronavirus would have during the same period. Among those vaccinated and above 65, 0.2% of those vaccinated died during the 3-week period between doses, hence about 200 among 100000 vaccinated. This is to be compared to the 4.91 dead among 100000 dying from COVID-19 without vaccination, see below. This should not be confused with the COVID-19 0.279 deaths among 100000 reported for those who completed the vaccination process, meaning 2 weeks after the second dose, see below table from the Ynet article.

נפטרים מكورونا			
גיל	לא מוחסנים (שיעור 100-7 אל' איש)	מחוסנים (שיעור 7-100 אל' איש)	שיעור 7-100 אל' איש
-	0.01	0.01	15-44
89.7%	0.0196	0.19	45-65
94.3%	0.279	4.91	65+

Age	Unvaccinated per 100000	Vaccination complete per 100000	Efficiency
15-44	0.01	None	-
45-65	0.19	0.0196	89.7%
65+	4.91	0.279	94.3%

This scary picture also extends to those below 65, among which, for the 5 weeks during the complete vaccination process 0.05%, meaning 50 among 100000, died. This is to be compared to the 0.19 per 100000 dying from COVID-19 and that are not vaccinated in that age group, as per the above table. Hence the death rate of this age group increased by 260 during this 5-week period of the vaccination process, as compared to their natural COVID-19 death rate.

A simple way to pass these points across relate to the monthly COVID-19 deaths rates since the start of the pandemic and until mid-December, 3014 deaths, hence  $3014/9 = 334.9$  deaths per month. Monthly death rates since mid-December are  $2337/2 = 1168.5$  deaths per month, hence 3.5 times greater.

We conclude that the Pfizer vaccines, for the elderly, killed during the 5-week vaccination period about 40 times more people than the disease itself would have killed, and about 260 times more people than the disease among the younger age class. We stress that this is in order to produce a green passport valid at most 6 months, and promote Pfizer sales. These estimated numbers of deaths from the vaccine are probably much lower than actual numbers as it accounts only for those defined as COVID-19 deaths for that short time period and does not include AVC and cardiac (and other) events resulting from the inflammatory reactions in tens of reports documented on the NAKIM site, which themselves are only the iceberg's tip, see [here](#).

This does not account for long-term complications described in a criminal complaint filed in December 2020 in France and which was translated to english, see [here](#).

Looking back, this explains why the serious COVID-19 cases increased as vaccination started, and why cases started to decline when vaccination was opened to the young and continue to decline as the vaccination national campaign is losing its momentum.

We hope that this massacre will not include those below 13, as these have an increased adverse reaction rate, including death, to vaccines as shown by multi-decennial data from the VAERS reports in the USA.

We summarise that the pandemic may be predicted for the coming weeks. The decrease in vaccinations and in vaccination age will cause a decrease in serious cases, mainly not because of the protection by the vaccine, but because fewer people will die from the vaccine and other adverse vaccine reactions.

This will be temporary as in a few months we expect to face mid- and long-term adverse effects of the vaccination as ADE (Antibody-dependent Enhancement) and the vaccination-resistant mutants selected by the vaccines. But this should occur after the soon coming elections and the (survivor) voters won't have another opportunity to express their disappointment at the voting poll.

Thanks to Dr Hervé Seligmann for his huge support on data analysis.

Debriefing de Haim Yativ, ingénieur, et du docteur Hervé Seligmann, de l'unité de recherche sur les maladies infectieuses et tropicales émergentes de la faculté de médecine de l'université d'Aix-Marseille. Haim Yativ et le Dr Seligmann ont analysé les données vaccinales d'Israël dans un article publié sur le site Nakim.org.

Le Collectif citoyen de FranceSoir et l'association Bon Sens sont très attachés aux publications, analyses des données, du retour d'expérience des divers pays sur la vaccination, et se sont intéressés à l'article. Nous avons demandé à les interviewer afin de comprendre leur analyse et ses limites.

close

volume\_off

Les auteurs de l'article déclarent n'avoir aucun conflit ou lien d'intérêt, autre que celui d'avoir des enfants en Israël.

Un debriefing complet qui, après une présentation, évoque leur analyse des données, les validations menées, les limitations et surtout les conclusions qu'ils demandent à confronter aux données demandées via une requête au ministère de la Santé, par le biais de l'équivalent de la CADA (Commission d'accès aux documents administratifs) israélienne.

Les constats sont simples :

Il y a une inadéquation entre les données publiées par les autorités et la réalité sur le terrain.

Ils ont trois sources d'information, outre les emails et messages d'effets secondaires qu'ils reçoivent par le biais d'internet.

Ces trois sources sont Ynet, site d'information israélien, la base de données du ministère de la santé israélien, et la base aux Etats-Unis du VAERS (effets secondaires).

En janvier 2021, il y a 3000 enregistrements d'effets secondaires des vaccins dont 2900 pour les vaccins ARNm.

Par rapport aux autres années, la mortalité est 40 fois supérieure.

Le 11 février un article de Ynet, présente des données liées à la vaccination. Les auteurs de l'article ont "débunké" cette analyse, en se basant sur les données publiées par Ynet.

« On a repris les données en regardant la mortalité pendant la période de la vaccination qui dure 5 semaines. En analysant ces données, on arrive à des chiffres effarants qui donnent une mortalité importante du vaccin. »

Les auteurs déclarent « que les vaccinations ont causé plus de décès que le coronavirus n'en aurait provoqué pendant la même période. »

Haim Yativ et le Dr Seligmann déclarent que pour eux « ceci est une nouvelle Shoah » devant la pression des autorités israéliennes pour vacciner les citoyens.

Ils invitent aussi les spécialistes à venir compléter leurs analyses, et entendent donner des suites judiciaires à cette découverte, si elle venait à être validée par les données du ministère : contacté, ce dernier n'était pas disponible...

Vaccination in Israel: Challenging mortality figures?

Analysis by infectious disease specialist claims mismatch between data published by authorities and reality on the ground.

'Science will win': PfizeriStock

A front-page article appeared in the FranceSoir newspaper about findings on the Nakim website regarding what some experts are calling "the high mortality caused by the vaccine."

The paper interviews Aix-Marseille University Faculty of Medicine Emerging Infectious and Tropical Diseases Unit's Dr. Hervé Seligmann and engineer Haim Yativ about their research and data analysis. They claim that Pfizer's experimental shot causes "mortality hundreds of times greater in young people compared to mortality from coronavirus without the vaccine, and dozens of times more in the elderly, when the documented mortality from coronavirus is in the vicinity of the vaccine dose, thus adding greater mortality from heart attack, stroke, etc."

Dr Hervé Seligmann works at the Emerging Infectious and Tropical Diseases Research Unit, Faculty of Medicine, Aix-Marseille University, Marseille, France. He is of Israeli-Luxembourg nationality. He has a B. Sc. In Biology from the Hebrew University of Jerusalem, and has written over 100 scientific publications.

FranceSoir writes that they follow publications, data analyzes, and feedback from various countries on vaccination, and have therefore taken an interest in the Nakim article, asking to interview them in order to understand their analysis and its limitations.

The authors of the article declare they have no conflicts or interests other than having children in Israel.

After a presentation, the authors discussed their data analysis, the validations carried out, limitations, and above all, their conclusions that they compare with data received via a Health Ministry Freedom of Information Act request.

Their findings are:

There is a mismatch between the data published by the authorities and the reality on the ground.

They have three sources of information, besides the emails and adverse event reports they receive through the Internet. These three sources are Israeli news site Ynet, the Israeli Health Ministry database, and the U.S. federal Vaccine Adverse Event Reporting System (VAERS) database.

In January 2021, there were 3,000 records of vaccine adverse events, including 2,900 for mRNA vaccines.

Compared to other years, mortality is 40 times higher.

On February 11, a Ynet article presented data related to vaccination. The authors of the Nakim article claim to have debunked this analysis based on data published by Ynet itself: "We took the data by looking at mortality during the vaccination period, which spans 5 weeks. By analyzing these data, we arrived at startling figures that attribute significant mortality to the vaccine."

The authors say "vaccinations have caused more deaths than the coronavirus would have caused during the same period."

Haim Yativ and Dr. Seligmann declare that for them, "this is a new Holocaust," in face of Israeli authority pressure to vaccinate citizens.

They also invite specialists to complete their analyses, and intend to pursue legal follow-up to their discovery. The Health Ministry was not available for comment on a FranceSoir query regarding the findings.

The authors also deplored "the fact of not being able to communicate on this vital information" to their fellow citizens.

On their site, Nakim writes: "On February 11, 2021, Ynet (the most known Israeli News website) published a confused and confusing article entitled 'Vaccination efficiency data in Israel, and its rapid effects on the young'.

"Our reanalyses of these data explain why during the massive vaccination project initiated mid-December 2020 during a confinement, daily new confirmed COVID-19 cases failed to decrease as they do during confinements, and, more importantly, why numbers of serious, critical, and death cases increased during that period that covered at least one month. From mid-December to mid-February (two months), 2,337 among all Israeli 5,351 official COVID-deaths occurred. Our analyses indicate orders of magnitude increases in deaths rates during the 5-week long vaccination process, as compared to the unvaccinated and those after completing the vaccination process. Presumably, asymptomatic cases before vaccination, and those infected shortly after the 1st dose, tend to develop graver symptoms than those unvaccinated.

"The Ynet article is organized in an exciting way and uses data provided in an erroneous way by the Ministry of Health. It is unclear whether this was intentional to prove the vaccine's efficiency or if this was done erroneously because the provided data were misunderstood. Note that in Israel, all vaccines are from Pfizer.

"The data in the table, rather than indicating the vaccine efficacy, indicate the vaccine's adverse effects," the authors conclude.

il suffit de visiter son site totalement vide pour comprendre que si son site est rempli comme son cerveau ses articles doivent être de la même teneur.

d'ailleurs la traduction de son nom en hébreu veut dire épine, qui évoque en hébreu immédiatement l'expression kots batahat et je laisse à Mr Kouts le loisir d'en découvrir l'interprétation.

Il serait intéressant de savoir pour qui Mr Kouts travail en tant que consultant considérant qu'il n'a même pas le besoin de développer son propre site web, ne serait-ce pas pour Pfizer par hasard ou peut-être carrément Mr Bill Gates??dites-le nous Mr Kouts nous voulons connaître vos intérêts pour désinformer?

Mr Kouts a mis entre guillemets mon titre "ingénieur israélien" à titre de dénigrement. Et bien Mr Kouts je vous joint mon attestation d'étude et de diplômé à l'école polytechnique de Haifa la plus réputée d'Israël et parmi les 100 premières mondiales dans mon domaine.

Inutile de vous préciser Mr Kouts que mon diplôme d'ingénieur en informatique/électronique est parmi les plus difficiles à obtenir au Technion si ce n'est le plus difficile, et je vous invite à juste essayer de passer l'examen pour y être juste accepter et de publier vos résultats sur Twitter...

TO WHOM IT MAY CONCERN

This is to certify that Yativ Haim i.d. 01 \_\_\_\_\_

was a regularly enrolled student in the dept./faculty of Computer Science

Between the following dates: October 1988 -- January 1993

Remarks:

Mr./Ms. Yativ was awarded the degree of B.Sc. in Computer Engineering on April 1993.

Academic Secretary Undergraduate Studies

Haifa, September 15, 2019.

TECHNION CITY, HAIFA 3200003, ISRAEL FAX 04-8293441, PHONE 04-8295858, EXT. 3200003

Pour nier la corrélation entre la montée de la mortalité et le début de la campagne de vaccination Mr Kouts écrit:

"Pour rappel voici la courbe de mortalité COVID19 en Israël, effectivement la 3ème vague est beaucoup plus meurtrière, et pourrait coïncider avec le début de la vaccination en Israël.

En réalité pas vraiment, la vaccination a commencé le 19 décembre, les cas avaient déjà bien commencé à augmenter avant et on sait que c'est exponentiel à partie de là si on ne fait rien."

Manque de chance Mr Kouts il n'y a rien de prévisible dans une épidémie c'est le prof Raoult qui le dit et pour preuve que vous avez tord je vous ramène deux graphes l'un montrant que le 19.7.2020 il y a eu un pic de 76 malades dans un état grave qui a ensuite décliné et qui ne représente en rien un pic d'épidémie

et de la même façon les 68 malades graves en date du 19.12.2020 date du début de la vaccination ne représentait absolument pas un signe de début de pic d'autant que c'est moins que le 19 juillet et que de plus nous étions en plein hiver.

## חולים חדשים - יומי

אך - סה"כ 18 222 חולים קשיה | 3 חולשים מוגשים מרגע תחילת המשבץ (מרץ 2020)

ממוצע חולים קשיה לתקופת הזמן המוגדרת ● חולים קשיה

Par contre la montée fulgurante de la mortalité immédiatement après le début de la vaccination conforte nos dires concernant la toxicité du "vaccin" de Pfizer.

Mr Kouts qui ne comprend rien aux chiffres manifestement, continue comme suit

"Revenons à l'article, il s'intéresse donc à lier l'augmentation des morts par le vaccin, qui induirait du COVID19 (ou un autre truc idiot comme ça). Il aurait tué 40 fois plus dans la même période que la COVID19 elle-même. Comment ils calculent ça ? Facile on prend une période avec moins de morts (tous les mois de mars jusqu'à début décembre), qu'on compare au mois le plus meurtrier de la pandémie en Israël (véridique, c'est sa méthodologie...). (Remarquez qu'on passe de 3,5 fois à 40 fois on sait pas trop comment – 40 fois ça voudrait dire  $334 * 40 = 13360$  en un mois à comparer avec la mortalité totale en Israël qui est de 45 000 annuellement... n'importe quoi donc)"

gross mensonge puisque nous avons comparés les chiffres de mortalité à rien d'autre qu'au tableau rouge ramené par Ynet, sur lequel ils se sont basé pour démontrer l'efficacité du vaccin de Pfizer en précisant bien que ce tableau parlait de comparaison sur 5 semaines.

Mr Kouts continu ses élucubrations en disant pas moins:

"C'est donc évidemment totalement débile d'utiliser VAERS pour les cas en israël (pas la même population, densité, comorbidités...) ni les mêmes façon de vacciner selon les pays, ni les mêmes vaccins"

Mr Kouts il serait plutôt "débile" de ne pas comprendre qu' a été l'usage que nous avons fait des données du Vaers, les données américaines nous ont été utiles pour déterminer le rapport de la mortalité entre les ages du vaccin de Pfizer. Cette donnée n'est pas dépendante d'un pays quelconque. Mr kouts a de nouveau prouvé qu'il n'aurait jamais réussi les examens pour être admis au Technion, ne parlons pas d'y obtenir un diplôme.

continuons Mr Kouts qui a la technique du matraquage d'inepties pour fatiguer ses lecteurs passent ensuite enfin au grand tableau de Ynet avec les données.

"On voit sur +60 ans 636 morts au total, mais surtout on voit que la grande majorité intervient dans les 13 jours après la première dose. Cela prouve donc l'efficacité du vaccin (qu'il ne veut pas voir)  
Mais non, lui voit quoi ? Que le vaccin a tué 646 personnes et mis à l'hôpital 865 !  
Voici son explication qui pour lui montre que c'est dû au vaccin pour l'hôpital!"

Mr Kouts qui ne comprend absolument rien a la mortalité du covid voit dans le fait que les morts arrivent dans les 13 jours suivant la première dose la preuve de l'efficacité du vaccin, grave erreur Mr Kouts comme le prouve les rapports du Vaers sur le vaccin de Pfizer les morts tombent en moyenne dans les 4 jours suivant le vaccin.  
De plus Mr Kouts la mortalité normale de gens testés positifs au Covid est bien inférieur à 1% cela incluant les vieux de plus de 80 ans, alors que dans le tableau sur lequel vous aussi vous appuyez pour vanter les mérites de Pfizer la mortalité globale est de 1.5 pourcent (660 pour 43871) alors que comme décrit durant l'interview les gens de plus de 80 ans qui représente 37% de la mortalité du covid en Israël n'y figurait pratiquement pas car vaccinés dès la fin décembre et que le tableau est daté du 10 février. De plus les 1251 malades graves ou critiques du tableau et qui font partie intégrante de l'échantillon de 43871 vaccinés vont eux aussi malheureusement fournir leurs quotes parts de mortalité supérieur à 20% d'entre eux. cela nous amenant à une mortalité supérieur à 2% sur les 43871 vaccinés soit au minimum 3 fois supérieur à celle de gens non vaccinés incluant les + de 80 ans alors que le tableau de Ynet ne les incluaient pas.

De plus Mr Kouts fait abstraction des morts subites (cardiaques, AVC) suite au "vaccin" de Pfizer qui ne sont pas comptabilisées comme des décès Covid.

pour terminer l'embrouille, Mr Kouts nous ramène au début de la video sur le VAERS et nous dis:

"(sur la vidéo france soir ils comparent les morts vaccins covid en janvier 2021 VS tous les autres vaccins en janvier 2020 - les 2 sans aucune base et source - enfin c'est pas clair et ils sont pas d'accord entre eux)"

grosses mensonges supplémentaires que voila, alors que nous parlions du Vaers pour signifier l'énorme nombre de décès rapportés en Janvier 2021 aux Etats Unis pendant la vaccination Pfizer/Moderna de 456 décès sur 3000 rapports comparés à seulement 14 décès en Janvier 2020 sur un nombre similaires de rapports concernant des vaccins classiques.

en Résumé Mr Ari Kouts fait parti des innombrables Troll que je côtoie sur facebook diffusant de la désinformation. au vu du nombre de Tweet mensonger de ce monsieur il me semble qu'il était grand temps de lui clouer le bec.

(Mr Kouts je vous laisse debunker les innombrables fautes d'orthographies et de ponctuation de ma réponse, vous m'excuserais mais vous ne valez pas la peine que je les corrige)

Jean-François Cliche débunké ou "Le Soleil" ouuuust a l'ombre

Un nouvel essai de débunkage de nakim.org et cette fois de Mr Soleil. (son article est également joint plus bas en PDF au cas ou...)

Comme je l'ai écrit avec Mr Kouts plus haut quand il s'agit de santé publique je suis sans pitié donc Mr Soleil désolé pour ce qui va suivre.

Je n'ai pas réagis tout de suite car j'étais occupé et grand bien m'en a pris car l'article de Mr Soleil a été repris ici devinez par qui ? par MSN network oui !!! le réseau de Microsoft celui de B I L L G A T E S du coup d'une pierre deux coups !

J'étais donc occupé à débunker ici l'article pseudo-scientifique du New England Journal of medicine de mes concitoyens Israéliens vantant les qualités du « vaccin » Coco-vide de Pfizer voir ici, oui oui ceux la même qui avouent toucher des subventions de Pfizer pour leur «bons et loyaux » services à la science. Donc après avoir démontrer avec le Dr Seligmann que leur papier scientifique et aussi neutre et fiable qu'une pub de Pfizer nous pouvons enfin passer à Mr Soleil qui a lui aussi tenter de nous « éclairer » sur les mérites de l'injection d'ARN expérimentale de Pfizer (désolé de ne pas l'appeler vaccin mais notez que je me suis retenu par respect pour vous d'écrire poison ).

Mr Soleil commence mal en traitant Nakim de « site avec des contenus à forte teneur conspirationniste » Mr Soleil qui détient la vérité première qui lui a probablement été transmise par Bill Gates en personne a appris l'hébreu et le droit israélien en deux temps trois mouvements et s'est également spécialisé sur le sujet de la corruption en Israël et du haut de son génie nullement égalé s'est déjà permis de jauger les actions juridiques et autres de NAKIM à la cours suprême en Israël cités maintes fois par la presse israélienne et a nous traiter de conspirationniste à deux balles... bon ok avec le Soleil on ne discute pas...

Après avoir rabaisé le support c'est au tour des auteurs :

« L'auteur du billet, Haim Yativ, se présente comme un ingénieur » je ne me présente pas comme un ingénieur dommage de ne pas avoir lu avant ma réponse à votre collègue Ari Kouts, je suis ingénieur et diplômé de pas n'importe quelle école un ptit coup d'œil au dessus chez Kouts votre altesse...

Quand au Dr Seligmann il n'est pas un médecin distribuant des médicaments comme le conçoit Mr Soleil mais c'est un biologiste chercheur ayant publié plus de 100 articles scientifiques et ayant travaillé des années chez le Prof Raoult, bref à la pointe dans le domaine.

Mr Soleil continue donc bien lancé avec ses inepties et nous raconte des « histoires de pomme et d'orange » : « Le hic, cependant, c'est qu'il compare des pommes avec des oranges : le nombre de patients dans un état grave est un « instantané » qui ne concerne qu'une seule journée alors que le tableau de Ynet cumule des cas survenus sur une assez longue période (au moins deux semaines, voire plus). Pour s'en faire une idée, on n'a qu'à songer au fait que le tableau de Ynet fait état de 660 décès alors que la COVID-19 tue environ 35 personnes par jour depuis un mois. On ne peut donc absolument rien tirer d'une telle comparaison. »

Mr Soleil qui lit ce qui l'arrange a apparemment omis dans l'article la phrase :  
"For that purpose we need first to understand that the provided table describes the state of COVID-19 patients that got the first or the second vaccine dose at given dates, as started in the article "...emerges from the data that among 856 patients above 60 years in serious state hospitalized at this time..." we assume that the article published February 11 reflects the situation in hospitals the previous day, hence February 10 2021, or February 11 2021."

Le tableau nous décrit donc clairement le nombre de gens hospitalisés à la date de l'article et pas accumulé comme le prétend Mr Soleil, en cas de doute Mr Soleil qui comprend si bien l'hébreu comme dit plus haut aurais pu se pencher sur la version israélienne qui est sans appel « kaet » est en hébreu à l'instant présent.

Quand au nombre de décès il est bien évidemment accumulé comme nous l'avons bien décrit dans l'article.

Maintenant sûre de lui Mr Soleil s'arme de chiffre de la banque mondiale pas moins (dis moi qui tu fréquentes je te dirais qui tu es...) pour nous dire que la mortalité de 0.05% pour 5 semaines est à peine plus élevé que la mortalité attendue de 0.048%

Le paramètre qu'oublie notre prétendu critique scientifique c'est notre phrase: " This death rate relates mainly to a relatively young population whose vaccination stated on January 19, a period during which most vaccinated were below 65."

Qui explique donc pourquoi ce chiffre de mortalité est excessif puisque la part du lion de la mortalité en Israël comme dans tout autre pays est composée des gens de plus de 65 ans et pas le contraire.

De plus et essentiellement la mortalité de 0.5% par an ramenée par Mr Soleil est la mortalité globale toute cause confondue incluant suicide accident de voiture cancers, attaque cardiaque et autre, alors que l'année passée la part du Covid dans cette mortalité était de bien moins de 10%. Tant et si bien qu'une mortalité que de Covid qui dépasse la mortalité générale habituelle sur cette période de 5 semaine et cela pour une écrasante majorité de gens de moins de 65 ans cela est une CATASTROPHE.

Mr Soleil continue avec ses élucubrations sous le titre « –la pire vague » expliquant que la hausse de la mortalité en décembre à février est juste causée par la monte des cas Covid. Manque de pot pour la lumière émanant du cerveau de Mr Soleil, nous avons débunké l'article du New England Journal Of Medicine et au passage nous avons glané la preuve de nos dires de leurs propres données. La première injection de Pfizer multiplie par 3 le nombre de malades Covid chez les vaccinés. Maintenant que je vous ai mis à l'ombre Mr Soleil, Je vous invite à lire notre article, puisque faute d'emploi vous aurez tout le temps de réfléchir à vos actes d'avoir encouragé les gens à se faire vacciner avec ce produit plus qu'inquiétant.

Quand à votre final et votre verdict vous savez maintenant quoi en faire au vu de notre debunking de L'article scientifique sur lequel le ministère de la santé israélienne et vous-même vous vous basez.

Quand à l'argument ajouté pas votre collègue de MSN aux votres, je l'ai démonté dans sa langue, plus bas

Haim Yativ

British and Israeli government data confirm Covid-19 vaccine risk: infections INCREASE in fortnight after jab

Anyone raising concern about the safety of Covid-19 vaccines faces derision as an 'anti-vaxxer', but the real extremists are those who refuse to hear evidence that something is going badly wrong with this mass experimental intervention.

Now a Public Health England <https://www.gov.uk/government/news/new-data-show-vaccines-reduce-severe-covid-19-in-older-adults>

Advertisements

.report confirms that infections increase during the fortnight after vaccination

As the vaccination programme began in earnest in January, worrying signs came from care homes, where many of the initial target population of people aged over 80 reside. At Pemberley House in Basingstoke, a third of the residents (24) died of Covid-19 in a home that had previously been free from the disease. Similar reports emerged from Germany

The clearest indications came from small countries that strove to vaccinate their entire adult population. The British enclave of Gibraltar was supplied with the Pfizer vaccine on 16th January and the elderly were swiftly jabbed. Suddenly this tiny state, home to 33 thousand, had the worst Covid-19 mortality in the world (now 2761 per million). From merely 9 deaths in December, now almost a hundred have died. The health minister angrily denied claims that the vaccine was killing people, but eventually admitted that some deaths had occurred in recipients

The United Arab Emirates received large batches of the Chinese Sinopharm vaccine as well as the Pfizer product in December. As stated by Amer Sharif, head of the Covid-19 Command & Control Centre in Dubai, the UAE aimed to be the first country in the world to achieve 100% vaccination of eligible adults. An increase in deaths was attributed to mutant strains, but as in other countries the rate rose disproportionately in the vaccinated age band. On 10th February a new daily high of 18 deaths from the coronavirus was recorded, and the trend has continued. Considerably more people are dying than in the first wave last spring – despite the hubristic inoculation

More evidence of iatrogenic harm came from Israel, which started vaccinating on 19th December. As reported by former New York Times journalist Alex Berenson, while Covid-19 mortality escalated among Israelis throughout January, in Palestine it declined steeply after a surge in December. Yet the Palestinians had no vaccine

This correlation is more than coincidental. Analysis <http://www.nakim.org/israel-forums/viewtopic.php?t=270812&s=The uncoveting of the vaccination data in Israel reveals a frightening picture>

of Israeli health ministry data by Hervé Seligmann at Aix-Marseilles University indicates that about 40 times more elderly people died of Covid-19 in the three weeks between their first and second doses than among those who were not vaccinated. Sacrificial lambs? Deaths in Israel are now falling, which politicians and media attribute to the vaccine, although there is a global trend of the virus becoming less deadly

The mortal complication has a temporal pattern that varies between countries, apparently depending on when vaccination started. Jordan was supplied with 3800 tons of Sinopharm on 9th January, after approval for 'emergency use'. The King of Jordan and other prominent figures were shown on television receiving the vaccine, to encourage the people to follow. A deal was also struck for 2.2 million doses of the Pfizer product. At this time nearly four thousand had died of Covid-19

By the end of February half a million had been jabbed, but this was slow progress in a land of ten million. Meanwhile coronavirus cases had surged, as had deaths. A night curfew was imposed. Yet most of those dying were in the age

group prioritised for the vaccine; many would have had the supposedly life-saving substance. Yesterday another 37 died, and the death toll is now approaching five thousand. Perhaps that explains hesitancy in the Hashemite kingdom

It should not be unexpected that Covid-19 vaccines have deleterious as well as intended effects. Pfizer data shows significant lymphocyte depletion in the first week after vaccination. June Raine, chief of the UK medicines regulator MHRA, acknowledged that 'a week or two' is needed to build up immunity after the first jab

The Public Health England study, which was hailed by health secretary Matt Hancock for the reported 80% decrease in hospitalisations, actually showed a 48% rise in infections after the first dose of Pfizer and Astra Zeneca vaccines. The authors, however, blamed this on a higher risk of exposure. Mary Ramsay, head of immunisations at PHE, stated that 'this adds to growing evidence that the vaccines are working to reduce infections and save lives'. She glossed over the hundreds who died after getting the jab

This is what may be happening. Vulnerable people who unknowingly had Covid-19 or whose immune system was keeping it at bay, succumbed to the disease after the vaccine lowered their immunity. The virus struck hard, leading to severe symptoms, cytokine storm and pneumonia. It is also possible that previously shielding persons were cross-infected by the vaccinators

This needs proper scrutiny, not reckless denial by those who are meant to protect us. This defensiveness and censorship is how the thalidomide scandal arose. The authorities have apparently cast aside everything we have learned about ethical safeguards in clinical and experimental treatment. Perhaps it is relevant that the British medicine regulator is heavily funded by the Bill & Melinda Gates Foundation

Why aren't doctors raising the alert? In medical training, hardly a day is given to learning about vaccines, and Big Pharma has undue influence on this noble profession. With critical thinking and dissent stifled by the Covid regime, most doctors are mere conformists. We must appeal to the brave few medics to continue their efforts to expose the deadly hazard of this highly dubious intervention

מפורסם: שבת נושא החודעה: 2:33 06.03.21 Debunking of Jean-François Cliche, taking the sun/Soleil straight to the shadow

הצטרף: ינואר 23, 2006  
הודעות: 911

## Debunking of Jean-François Cliche and Dan Satherley, taking the sun/LeSoleil straight to the shadow

A new debunking try for nakim.org , and this time from Mr Soleil/Sun (Jean-François Cliche). (his article is also attached below in PDF in case Mr Soleil and Bill Gates' MSN/Dan Satherley will retract...) As I wrote with Mr. Kouts above when it comes to public health I am ruthless so Mr. Soleil sorry for what follows.

I didn't react right away because I was busy and it was very good for me because Mr. Soleil's article was picked up, guess by whom? by MSN network yes !!! !!! the Microsoft network that of B I L L G A T E S!!! with one stone two birds!

So I was busy debunking here the pseudo-scientific article of the New England Journal of medicine of my fellow Israelis touting the qualities of Pfizer's Coco-vid "vaccine", yes yes those same who admit receiving grants from Pfizer for their "good and loyal" service to science.

So after having demonstrated with Dr Seligmann that their scientific paper is as neutral and reliable as a Pfizer ad, we can finally move on to Mr Soleil who also tried to "enlighten" us on the merits of the experimental RNA injection from Pfizer (sorry not to call it a vaccine but note that out of respect for you I refrained from writing poison).

Mr. Soleil starts badly by treating Nakim as a "site with high conspiracy content" Mr. Soleil who holds the primary truth which was probably transmitted to him by Bill Gates in person learned Hebrew and Israeli law in two days and has also specialized in the subject of corruption in Israel and from the height of his unparalleled genius has already taken the liberty of gauging the legal and other actions of NAKIM at the Supreme Court in Israel cited many times by the Israeli press and to treat us as a double-barreled conspirator ... well, ok with the Sun, we don't argue ...

After lowering the medium, it's the authors' turn: "The author of the post, Haim Yativ, presents himself as an engineer" I do not present myself as an engineer too bad not to have read before my answer to your colleague Ari Kouts, I am an engineer and a graduate of not just any school but the Technion, a little glance above at my Kouts debunking your highness ...

As for Dr Seligmann, he is not a doctor distributing drugs as Mr Soleil conceives, but he is a research biologist who has published more than 100 scientific articles and who worked for years with Prof Didier Raoult, in short at the cutting edge in the field.

Mr. Soleil therefore continues well with his ineptitude and tells us "stories of apple and orange": "The problem, however, is that he compares apples with oranges: the number of patients in serious condition is a 'snapshot' which concerns only one day while the Ynet table accumulates cases that have occurred over a fairly long period (at least two weeks, or even longer). To get an idea, one only has to think of the fact that the Ynet table shows 660 deaths as COVID-19 has killed around 35 people a day for the past month. So absolutely nothing can be drawn from such a comparison."

Mr. Soleil, who reads what suits him, apparently omitted from the article the sentence: "For that purpose we need first to understand that the provided table describes the state of COVID-19 patients that got the first or the second vaccine dose at given dates, as started in the article"... emerges from the data that among 856 patients above 60 years in serious state hospitalized at this time... "we assume that the article published February 11 reflects the situation in hospitals the previous day, hence February 10 2021, or February 11 2021."

The table therefore clearly describes the number of people hospitalized at the date of the article and not accumulated as claimed by Mr. Soleil, in case of doubt Mr. Soleil who understands Hebrew so well as said above could have looked into the Israeli version which is without appeal "kaet" is in Hebrew at this day.  
As for the number of deaths, it is obviously accumulated as we have described in the article.

Now sure of himself, Mr Soleil is armed with data from the World Bank no less (tell me who you frequent I would tell you who you are ...) to tell us that the mortality of 0.05% for 5 weeks is barely higher than the expected mortality of 0.048% The parameter that our alleged scientific critic forgets is our sentence: "This death rate relates mainly to a relatively young population whose vaccination started on January 19, a period during which most vaccinated were below 65." So that explains why this death figure is excessive since the lion's share of mortality in Israel as in any other country is made up of people over 65 and not the other way around.  
In addition and essentially the mortality of 0.5% per year reported by Mr Soleil is the overall mortality from all causes including suicide, car accident, cancer, heart attack and other, while last year the share of Covid in this mortality was far less than 10%.

So much so that a mortality from Covid which exceeds the usual general mortality over this period of 5 weeks and that for an overwhelming majority of people under the age of 65 this is a CATASTROPHE.

Mr Soleil continues with his rantings under the title "- the worst wave" explaining that the increase in mortality in December to February is just caused by the rise in Covid cases. unluckily for the light emanating from Mr. Sun's brain, we debunked the New England Journal Of Medicine article and in the process gleaned evidence for our claims from their own data. The first injection of Pfizer multiplies by 3 the number of Covid patients among the vaccinated.

Now that I have put you in the shade Mr Soleil, I invite you to read our article,since for lack of employment you will have all the time to think about your acts of having encouraged people to be vaccinated with this product more that worrying.

Concerning your final and your verdict Mr Jean-François Cliché aka Mr Soleil, you now know what to do with it given our debunking of the scientific article you, Bill Gates' MSN, Dan Satherley and the Israeli Ministry of Health rely on.

concerning your peer Dan Satherley who wrote in addition to your false claims:

"Another claim in the post is that deaths from COVID-19 in Israel are now slowing because the vaccination campaign is "losing its momentum". This is demonstrably false - since mid-January, the number of people dying from COVID-19 each day has more than halved, while vaccination data shows the number of doses administered in Israel has continued its upward trajectory over the past two months, with no signs of slowing down."

Mr Satherley seems as well specialized in disinformation since we wrote in feb 15.2021:

"The decrease in vaccinations and in vaccination age will cause a decrease in serious cases"  
so from mid january it start getting down because from mid january the 65 and below start being shot with the pfizer RNA experimental product.

if we take a look to what happens since our article in Israel we can see that there was a decrease of serious case of 30 percent that match the decrease of the first shot vaccination rate:  
decrease of serious case from 1008 on feb,15 2021 to 710 on march,6 2021

**חדש אחרון**

**מספר חוליים קשה - פעילים**

**decrease of the vaccination on last 3 weeks  
the dark green is the first shot**

In conclusion: LeSoleil/Jean-François Cliche+Msn/Dan Satherley=Bill Gates=FAKE NEWS for pushing people to take the shot.

Regards  
Haim Yativ
